TV Travel Expects Record Quarterly Sales!

Phoenix, AZ, January 13, 2009: TV Travel is expecting record sales in the first quarter of 2009. The current talks of recession haven't affected sales at TV Travel as they posted December sales results. December was the third largest sales month in 2008 with a 17% increase over November sales. The reality is that people still want to travel and take vacations. With all of the travel promotions that are occurring, many TV Travel members are taking advantage of the lower ancillary costs of traveling. Many airlines and resorts are lowering prices to encourage travelers. The TV Travel package is a perfect compliment to those ready to travel and take advantage of the bargain prices available this spring.

TV Travel has ramped up in anticipation of this increase in demand of low-cost travel alternatives. They have expanded their sales staff, increased selling hours and added a new sales office in Chicago, IL. This is great news for TV Travel members as they are ready for the start of spring and summer vacation planning.

TV Travel is a turn-key home business opportunity that allows anyone, regardless of background or business experience, to start their very own business from home. TV Travel's professional staff helps new business owners with every aspect of business development and allows serious entrepreneurs the opportunity to launch a successful home business. Sales experience is not an issue with TV Travel's impressive system because they employ a large, well-trained sales staff that handles all of the calls for its members. Imagine owning a business with no sales involved! That is what TV Travel has created.
